PROFESSIONAL SUMMARY

Python Backend Developer with 1.5+ years of experience developing scalable enterprise web applications, RESTful APIs, authentication systems, and employee monitoring platforms using Python, Django, Django REST Framework, PostgreSQL, and MySQL. Experienced in JWT Authentication, RBAC, API Security, Celery, Redis, Docker, WebSocket integration, database optimization, CI/CD, and software development best practices.

WORK EXPERIENCE

Python Backend Developer, Emayam Technologies Private Limited Nov 2024 – Present

- Developed scalable backend applications using Python, Django, and Django REST Framework
- Designed and implemented RESTful APIs for web and mobile applications.
- Integrated third-party APIs and optimized database performance.
- Developed secure authentication and authorization modules using JWT-based authentication.
- Optimized database queries and API response times for PostgreSQL and MySQL databases.

PROJECTS

Project 1: FOCULT (Employee Monitoring Platform)

FOCULT is an employee monitoring and workforce management platform that helps organizations track employee activities, manage projects and tasks, monitor productivity, and ensure workplace compliance.

Roles & Responsibilities

- Developed a desktop employee monitoring platform for tracking user activity and productivity.
- Built scalable REST APIs using Django REST Framework for web and mobile admin dashboards.
- Developed modules for activity monitoring, screenshot capture, and automated reporting.
- Designed PostgreSQL database schemas and optimized queries for large-scale activity logs.
- Collaborated with cross-functional teams to enhance monitoring and analytics capabilities.

Key Technologies : Python, Django, Django REST Framework, PostgreSQL, React.js, Git

Project 2: ZMM (Zero Middleman)

ZMM (Zero Middleman) is a B2B marketplace platform that enables direct trade between farmers, producers, and buyers without intermediaries. It simplifies bulk product sourcing, quotation management, and business communication through a centralized digital platform.

Roles & Responsibilities

- Developed a marketplace platform connecting farmers, producers, buyers, and sellers.
- Integrated buyer-seller communication workflows for direct business interactions.
- Developed secure authentication and authorization mechanisms.
- Ensured scalability, security, and maintainability of the platform architecture.
- Collaborated with frontend developers to deliver responsive user experiences.

Key Technologies : Python, Django, Django REST Framework, MySQL, React.js, Git

EDUCATION

B.Tech – Information Technology	2019 – 2023
Kings Engineering College Chennai, Tamil Nadu.	CGPA - 7.79

SKILLS

Technical Skills

- **Programming Languages :** Python, SQL, JavaScript
- **Backend Frameworks:** Django, Django REST Framework (DRF), Flask
- **Database :** PostgreSQL, MySQL, Redis
- **Authentication & Security:** JWT Authentication, RBAC, API Security
- **DevOps & Tools:** Docker, Git, GitHub, Postman, Linux, Visual Studio Code
- **Concepts:** RESTful APIs, ORM, WebSocket, CI/CD, Unit Testing, PostgreSQL Optimization, Celery

Hard Skills

- | | |
|------------------------------------|--|
| • Backend Development | • Database Design & Optimization |
| • REST API Development | • API Security |
| • Authentication & Authorization | • Software Development Life Cycle (SDLC) |
| • Role-Based Access Control (RBAC) | • API Integration |

CERTIFICATIONS

- Inventory Management System Project – ICT Academy
- Python Programming Internship – CODSOFT
- Python Backend Development Certification – LOGIN360

ACHIEVEMENTS

- Best Performer of the Month – July 2025
- Best Leader of the Month – December 2025
